Good morning Alan.

Hope you are doing well.

Thank you for your thorough review of the 2016 IUD work plans.

I have contacted the correspondent regional/headquarter staff to assist me in providing feedback to your comments.

I am planning to submit them to you as an updated intended use plan. Would you be interested in a phone conference to expand on your comments regarding our submitted work plans.

Please let me know

Ivan

Adam,

Attached is a copy of the draft IUP with my comments in "red". Generally, I think the projects represent a good variety of NPS focused implementation, outreach and education activities. Over the next year, I think it would be good for us to take a close look at the framework for project submittals to see if there are areas where greater level of information is needed to ensure all components of the applications provide a high level of detail.

I hope my comments are helpful. Feel free to give me a call if you have any questions.

Alan

Thank you, Alan.

Wendy Wiles just gave us her approval to submit our application. However, we can wait until we receive your feedback on Monday before we submit. Hopefully this wouldn't happen, but it's possible that in responding to your questions about match that we could discover we have not correctly categorized match in our SF424 or SF424A.

Thank you,

Adam Coutu

**Subject:** RE: 319 Application

Adam,

Your questions are quite timely since I am currently working on my comments of the draft IUD. I am not sure if my comments will materially impact your application so it is hard to answer your questions. At this point my comments have generally focused on 1) the need to update previously proposed projects, 2) the need to provide complete budgets, and 3) the need to identify sources of match. I should be done with my comments by COB today or early Monday. If for some reason, I find it takes me longer to complete my comments, I will let you know. Before I leave today, I will send to you the comments I have developed thus far. From these you should be able to determine if there will be any “material” impacts to your application. I don’t think there will be. I hope this helps.

Let me know if you have any questions.

Alan

**Subject:** RE: 319 Application

Hi Alan:

We've completed a final draft and internal review of our application package, and have submitted it to Wendy Wiles, Environmental Solutions Division Administrator, for approval. Once Wendy approves, we could be ready to submit our application quickly.

We had planned to include Ivan's draft of the IUD as part of the application package. Do you have material changes to the IUD that could potentially impact how we prepared the SF424 and SF424A, or budget detail? Would you like us to wait to submit our application until we've incorporated your recommended changes into the IUD?

Or, could we submit our application now with the draft IUD, and you and Ivan could continue to polish the IUD on a parallel track?

Thank you,

Adam Coutu

Hi Alan

Josh coordinated DEQ edits to the 2015 NPS Annual Report, and I am currently reviewing those edits. Comments on the IUD would go to Ivan or possibly Adam, please cc me.

thanks

Gene

**Subject:** 319 Application

Josh,

I understand that you might be playing a bigger role in putting together the 319 annual report and possibly the application. If so, could we connect soon. I would like to get a sense of when things are coming my way. I am currently completing my review of the intended use plan and do want to give you all some feedback on this. We can discuss this on Tuesday, assuming we are

meeting on the CZARA issues then. If not, let's connect by phone.

Have a great weekend.

Alan
